

M/A/R/C[®] Research recently conducted an online survey among US health care decision makers to better understand the impact of the COVID-19 crisis on the health care industry.

Some of our findings include:

82%

claim they are likely to get the COVID-19 vaccine once it's available

and the majority would do so within the first 3 months

45%

as soon as it is available to me

28%

within the first 3 months

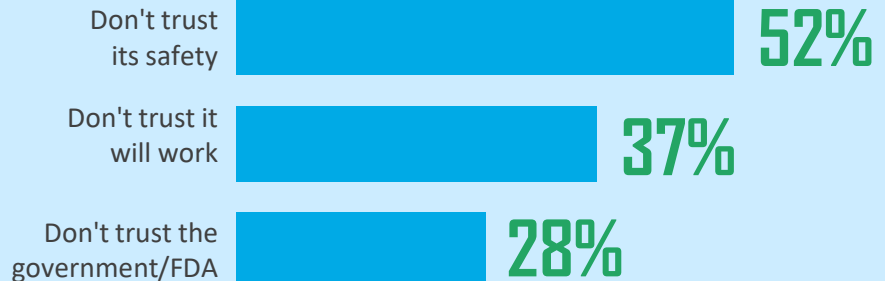

16%

after available 6 months

12%

after out more than 6 months

Among those who are reluctant to get the vaccine, trust is the primary concern.

We'd love to share more!
